

Insulating Safety Bag 210 x 130mm

Insulating PVC bag, ideal for use with EV & PHEV cable ends and connectors when disconnecting, to avoid accidental contact between components carrying different voltage.

Additional Information

- Transparent PVC (Polyvinyl chloride) insulating bag with a hook & loop closure at one end.
- Ideal for use with high voltage cable ends & connectors when working on a vehicle with live systems. Minimises risk of accidental damage &/or injury to technicians.
- Place the cable end or connector inside the open end of the bag & close around the cable.
- Ring eyelet at closed end aids removal by either an insulated gloved hand, or an insulated pole with hook.
- A larger, 305 x 225mm, insulated connector bag is also available, please see Laser Part No. 9041.
