

## HGV Track Rod Nut Spanner - 34mm

Designed for use on HGV track rods and drag links where fitted with 34mm hex nuts. The Laser 9046 is designed to bolt over the nut providing a very strong 360 degree clamping force to allow high torque to be applied when loosening, tightening and adjusting the track rods and drag links.

### Additional Information

- Applications include: DAF, Iveco, MAN, Mercedes-Benz, Neoplan, Renault & Volvo.
- Bolt together 34mm single hex spanner giving secure attachment to the nut.
- 3/4"D, for use with 3/4"D socketry or a 3/4"D breaker bar (see Laser Part No. 2381).
- Gives 360° grip, particularly useful when working on corroded & dirty joints.
- Manufactured from laser cut steel, with a black phosphate finish.
