

## Extra Long Lift Pads - 1590 x 200 x 33mm

A pair of extra long lift pads, 1590 x 200 x 33mm, designed for placing on or fixing to lift platforms. Suitable for use with scissor lifts, floor recessed lifts, and standard platform lifts. The new range of Laser lifting pads/blocks has been made from a highly durable, lightweight and long-lasting Polyurethane (PU) material, which is also oil resistant. Polyurethane is much lighter than traditional rubber, lasts much longer, and has greater flexibility, which means it reduces the risk of pressure damage on vehicle bodywork. Additionally, PU is easier to recycle and in keeping with other products in the Laser range that are already produced in recycled PU for a more environmentally friendly product range. The full range includes a variety of pads/blocks, designed to cover a wide range of workshop and bodyshop applications.

### Additional Information

- 2x 1590 x 200 extra long lift pads for placing or fixing in lift platforms. Suitable for use with scissor lifts, floor recessed lifts, and standard platform lifts.
- 33mm thickness, 1.139Kg.
- Ideal for use when lifting is required directly on the vehicle bodywork, safe to be driven over.
- Manufactured from solid Polyurethane (PU). Highly durable & oil resistant.
- 6000cm<sup>2</sup> surface area, gives only 0.5kg pressure per cm<sup>2</sup>.
