

Camera Adjusting Wrench - Tesla

Tesla vehicle self-driving and ADAS systems are heavily reliant on the use of camera technology. It is therefore vital the cameras are correctly adjusted, particularly if the cameras have been moved as a result of an accident or service/repair operations.

Additional Information

- Applications: Tesla Model 3, Model Y.
- Forward-facing camera (pitch verification) wrench, 2.5mm.
- Access to the camera may require the removal of the rear-view mirror.
- Manufactured from steel (K7).
- Equivalent to OEM 1448868-00-B. NOTE: Manufacturer specific OBD link required for use.
