

## Cylinder Head Stand Set

A pair of simple but very effective stands that fit in to the head bolt/stud holes allowing the cylinder head to be stood securely on a workbench. Can hold the cylinder head upside down when lapping in valves or the right way up when working on valves stems.

### Additional Information

- For holding cylinder heads securely but clear of the bench.
- Ideal for use on motorcycle & car cylinder heads.
- Tapered steel mounting rods to fit from 10mm to 16mm cylinder head stud holes.
- Manufactured from steel.
- Easy self-assembly. Ensure assembly nuts are tight before use.
