

Cooling Pressure Test Cap Set 6pc - for EV/Hybrid/ICE

A set of 6 cooling pressure test caps designed for a selection of common hybrid and electric vehicles. EV cooling systems are as important as IC engine cooling systems and require periodic servicing and testing. Their radiators, pipes and connections are just as susceptible to damage and wear as IC engine systems.

Additional Information

- Applications include: Fiat, MG, Renault & Tesla EV/Hybrid cooling caps.
- Includes: Tesla Model 3/Y (red), Tesla Model S/X (blue), MG EV (x2, black, orange), Alfa Romeo, Citroen, Nissan, Vauxhall, Peugeot, Renault, Volvo (black R) & Fiat 500E (green).
- Use with Laser cooling pressure test kit, Part No. 5614 or pump, Part No. 1735.
- Adaptors have quick-release couplings to match the pump from Part No. 5614.
- For coolant vacuum refill kit please see Laser Part No. 9116.
