

Wheel Stud Extraction & Fitting Tool Set - Car & Van

A simple and fast-to-use set of threaded sockets, extraction punch and fitting bearing. For extraction, simply part screw the relevant socket on and use the punch in a suitable air chisel to push the old stud out. For fitting, insert the new stud, place the bearing over the stud and use the appropriate socket to wind the stud into place.

Additional Information

- Applications include: BMW, Chrysler, Ford (including Transit), Hyundai, Kia, Mazda, Mercedes-Benz (including sprinter), Mitsubishi, PSA & VW Group models.
- Stud sizes covered: M12 x 1.25, M12 x 1.5, M14 x 1.5.
- Kit includes: 3x threaded sockets, 1x extraction air punch & 1x fitting bearing.
- Use air chisel for extraction. Use 21mm socket for insertion.
- NOTE: Lubricate the fitting socket threads with molybdenum disulphide grease.
