

Combination Pliers - Including Screw Extraction

A pair of combination pliers with uniquely shaped jaws that allow them to grip screw heads and small rounded bolt heads better than standard flat style combination pliers.

Additional Information

- Combines traditional combination pliers with a patented jaw design, featuring both horizontal & vertical grooves for gripping damaged screw heads.
- Length: 230mm; jaw opening: 23mm.
- Designed to grip small, low torque, fixings that have been damaged or rounded off.
- Manufactured from chrome molybdenum, handle PVC dipped for grip & comfort.
- Ideal for both DIY or professional use, a must have for any tool box.
