

Digital Brake Disc Caliper

A digital vernier gauge with a data hold function, suitable for measuring brake disc thickness. Features an LCD screen, which can display the measurement in either metric or imperial, with the caliper jaws designed to allow them to fit over any wear lip or corroded edge running around the outside of the disc, allowing for an accurate measurement to be taken from the braking surface. Ideal for use as part of a vehicle service or safety inspection.

Additional Information

- Digital caliper for measuring brake disc thickness.
- Features: Easy to read LCD screen with data hold function.
- Measures in metric & imperial. Range: 0-60mm (0-2.3622").
- Allows mechanics to clearly & accurately check brake disc measurements against manufacturers minimum thickness requirements.
- Supplied with 1x LR44 battery. CE & RoHS compliant.
