

Suspension Arm Lever Adaptor - 1/2"D

Designed to allow a 1/2" drive power bar or long handled ratchet to be securely and quickly attached to a suspension arm, providing the leverage required to separate the lower or upper suspension joints.

Additional Information

- Ideal when removing suspension struts, lower ball joints, suspension arms & wheel hubs.
- Suitable for use with 1/2"D power bars, breaker bars & ratchets.
- Features 3x 1/2"D holes to give multiple angle choices to attach the adaptor for improved access.
- Manufactured from S45C steel with a yellow passivate finish.
- Supplied with 2 screw in steel pins with a chrome plated finish.
