

## Brake Bleed Wrench Set - for German Vehicles 2pc

A set made up of 2 brake pipe ring spanners with 11 & 7mm socket extensions that allow the bleeding of brakes without removal of the wheels. In many cases the brakes can be bled through the wheel without going underneath the vehicle.

### Additional Information

- Applications include: Volkswagen Group, BMW, Mercedes-Benz & MINI.
- Kit consists of: 1x 7mm hex pass-through socket (length: 60mm); 1x 11mm hex pass-through sockets (length: 60mm) both equipped with nipples for connection to a brake bleeding bottle.
- Each socket is supplied with a dedicated wrench.
- Manufactured from Chrome Vanadium. Colour coded for ease of identification.
- Use with brake bleed catch bottles (Laser Part No. 2906), pressure bleeders (Part No. 8395) or vacuum bleeders (Part Nos. 5780 or 8003).
