

Deep Nut Driver & Setter Socket Tool Set 18pc

Designed to be used with any 1/4" hex cordless drill driver this kit has a 315mm long tube and a set of Go-Thru style single Hex (6pt) sockets with an external 19mm hex. The sockets fit onto the driver tube allowing nuts to be run along long threaded studs and bolts. The driver features a detent and holding spring, to prevent the socket from falling out when working vertically, a rotating sleeve, allowing for it to be positioned and held in place during use, and a quick chuck end.

Additional Information
