

Wire-Lock Seal Pliers inc 100pc Lead/Wire Seals

Lead sealing pliers are used to securely fasten sealing wire to a lead or plastic meter seal by crimping them together in a single operation. This creates a permanent, tamper-evident seal that prevents unauthorised access to devices such as HGV tachometers, electric and gas meters, luggage, water meters, fluid valves, and even VAG hybrid coolant caps.

Additional Information

- Applications include: Tachometers, electric meters, gas meters, luggage, water meters, fluid valves & VW Group hybrid coolant caps.
- Simple to use: thread the wire through the lead seal, loop it around the unit to be secured, and back through the seal, then close the seal with the pliers.
- Supplied with 100x lead seals & pre-cut steel wires. Top up seal & wires available separately, Part No. 34350.
- Removal only possible by cutting the sealing wire, indicating tampering has occurred.
- Can be used to attach warning tags & steering wheel covers, etc. to vehicle steering wheels etc.
